

External Vibrators 400 V

EA/B Series

Series EA/B 400 V electric cradle-type external vibrators are particularly suitable for formwork and vibratory vibrating tables.

They can also be used in situations where the vibrator has to be moved, such as in metallurgy, recycling, pollution control and quarrying. EA/B Series 400 V electric cradle-type external vibrators are mounted on a base plate.

Caractéristiques :

42 V FIXED FREQUENCY 200 HZ 3 000 RPM
Supplied unwired, without mounting plate

On request:

- *Wiring kit (5 m cable with CEE 17 plug)*
- *FRB2 or FRB4 quick-release cradle mounting plates*

Highlights:

- Fast, secure installation
- Easy to move

Energy : Electric

Sectors : Building and construction,
Prefabrication

Applications : Debubbling, Internal
vibration of concrete
