

Vibrating Table

TV/TG Series

CUSTOMIZED

Vibrating tables are used in a wide range of sectors: industry, construction, food & beverage, chemicals, nuclear... Their use meets a wide range of needs and is adapted to many different processes.

At Vibra France, over 30 years' experience enables us to offer vibrating tables of all sizes. Made to order, our vibrating tables are always designed according to the load to be vibrated and the appropriate motorization, from the smallest model for 40 kg of load to be vibrated to the 40-ton pre-slab bench.

Features:

- Composed of a floor-mounted frame and a tray
- Integrated vibrator(s)

On request:

- Strapping equipment for 300, 500, 1000, 1 500 and 2 000 mm gabions
- Other dimensions
- Other vibratory equipment
- Other frequency variations

Highlights:

- Robust and reliable
- Tailor-made to suit your needs

Energy : Electric

Sectors : Building and construction, Prefabrication

Applications : Debubbling, Internal vibration of concrete

Dimensions : mm

Type	Dimensions	Vibrating motor with 3000 rpm 230/400 V three-phase	Vibrating load (Kg)
Serie TV – for compaction, sorting, bagging, prefabrication for concrete, etc.			
TV1	600 x 400 x 800	EA3003-X	80
TV2	900 x 400 x 800	EA3003-X	120
TV3	1200 x 600 x 800	EA3006	240
TV4	1000 x 1000 x 800	EA3008-X	330
TV5	1500 x 1500 x 800	EA3010-X	350
Serie TG - For gabion			
TG3	2400 x 2000 x 800	2 vibrators EB1020	3500
TG5	2400 x 2000 x 800	2 vibrators EB1030	5000
