

# Vibratory feeders

BET Series

## CUSTOMIZED

BET series vibratory feeders are electromagnetic devices for conveying bulk materials or products over short distances. They are suitable for a wide range of industries, including pharmaceuticals, food processing and cosmetics. Their use meets a wide range of needs and is adapted to many different processes.

At Vibra France, over 30 years' experience enables us to offer customized vibratory feeders. We adapt the feeder to your needs, whatever the criterion: size, length, material, bevel to orientate the material...

The vibratory bases are controlled via a 230 V – 50 Hz control box, with a potentiometer in the standard configuration for precise flow adjustment.

### Features:

Corridor in stainless steel or standard version

*On request:*

*Three-phase version, double speed or with 4-20 mA signal*

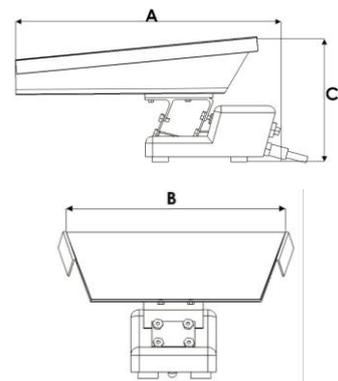

### Highlights:

Tailor-made to suit your needs

**Energy :** Electric

**Sectors :** Building and construction, Prefabrication

**Applications :** Debubbling, Internal vibration of concrete

Type	Débit* (T/h)	Power (W)	Intensity 230 V	A	B	C	Feeder (mm)			Weights (Kg)
							Bottom	Height	Top	
BET 12/50	2	16	0.25	540	185	201	120 x 500	50 à 60	185 x 545	14.8
