

Vibrating Screed

RDPE/RDPF Series

CUSTOMIZED

Vibratory screeds are used for levelling, smoothing and compacting industrial soils. They are particularly recommended for airport runways, bridge decks, tunnel inverts, tramway tracks, etc.

We offer 3 types of vibrating screed:

- RDPF/EHF and RDPE/EHF, high-frequency vibrating rulers
- RDPF/P and RDPE/P, pneumatic vibrating scales
- RDPF/T and RDPE/P, thermal vibrating rules

Features:

- Adjustable centrifugal force
- Steel or aluminum
- Comes with wireless vibration equipment and pull handles

Highlights:

- Heavy and powerful
- Easy to use
- Adapted to the type of power supply available

Energy : Electric

Sectors : Building and construction, Prefabrication

Applications : Debubbling, Internal vibration of concrete
